

EBRU YURTSEVEN

Senior Product & UI/UX Designer

Istanbul, Turkey | +90 544 358 58 85 | ebruyurtseven@gmail.com | ebruyurtseven.com | [LinkedIn](#) | [Behance](#) | [Figma](#)
English: Professional Working Proficiency

PROFESSIONAL SUMMARY

Senior Product Designer with 5+ years of experience across product, UI/UX, and digital design, specializing in end-to-end ownership of mobile-first product experiences. Independently owns product and problem areas from discovery through delivery, defining problems by evaluating user needs, business goals, product data, and technical requirements, and transforming complex user journeys into simple, scalable experiences. Advanced Figma proficiency, with mastery of components, variants, auto layout, and prototyping structures; builds interactive prototypes, micro-interactions, transitions, and motion scenarios that strengthen the mobile experience. Strong hands-on experience with design systems and component-based design, contributing to design standards and experience consistency across large-scale products. Integrates AI into the product design workflow, leveraging AI-powered tools across research, insight synthesis, ideation, design exploration, and prototyping. Partners closely with Product, Engineering, Data, and Customer Experience teams, supporting design decisions with research, data, and insights. Experienced designing high-traffic, real-time, payment-driven mobile experiences serving 10M+ users. Recognized with multiple international awards for excellence in digital financial services. Gazi University Industrial Product Design graduate.

CORE SKILLS AND COMPETENCIES

End-to-End Product Ownership: Independently owns product and problem areas from discovery to delivery; defines problems by evaluating user needs, business goals, product data, and technical requirements.

Figma Mastery & Prototyping: Advanced proficiency in Figma, including components, variants, auto layout, and prototyping structures; builds interactive prototypes, micro-interactions, transitions, and motion scenarios.

Design Systems & Component-Based Design: Strong hands-on experience building and evolving design systems, design standards, and experience consistency across large-scale products.

AI-Integrated Design Workflow: Effectively integrates AI into the design process, leveraging AI-powered tools across research, insight synthesis, ideation, design exploration, and prototyping.

User Flows, Wireframes & High-Fidelity UI: Creates user flows, wireframes, prototypes, and high-fidelity UI, translating complex user journeys into simple, scalable experiences.

Data-Informed Design: Supports design decisions with research, data, and insights (CVR, task success rate, behavioral analytics); proactively explores problem and opportunity areas.

Cross-Functional Collaboration: Works closely with Product, Software Development, Data, and Customer Experience teams to help shape product needs and priorities.

Design Critique & Culture: Actively participates in design critiques, idea sharing, and collaborative production processes; mentors designers and contributes to design culture and product quality.

TOOLS

Design & Prototyping: Figma (Components, Variants, Auto Layout, Dev Mode), Sketch, Adobe XD, Framer, Zeplin, Miro, Lottie

Research & Analytics: Hotjar, Microsoft Clarity, A/B Testing, Usability Testing Tools

Adobe Suite: Illustrator, Photoshop, Media Encoder, Premiere Pro, Creative Cloud

AI, Dev & PM: Claude Pro, Antigravity, Sora, Mobbin, AI-Assisted Design & Research Tools, Git, Jira, VS Code, HTML/CSS

3D & Visualization: Rhinoceros, Blender, Fusion 360, Keyshot

PROFESSIONAL EXPERIENCE

Product & UI/UX Designer (Digital Financial Services)

Allianz Türkiye (via Ting), Istanbul, Turkey (Hybrid)

Aug 2023 – Nov 2025

Core product designer for the Allianz App and Web platform, a high-traffic, real-time digital financial product serving 10M+ active users across insurance payments, money management, policy self-service, and digital channels. Independently owned product and problem areas from discovery to delivery, partnering with Product, Engineering, Data, and Customer Experience teams in an Agile environment.

End-to-End Product Ownership: Owned the full design lifecycle from discovery to launch, defining problems by evaluating user needs, business goals, product data, and technical requirements; transformed complex user journeys into simple, scalable experiences.

Figma & Prototyping: Built interactive, high-fidelity prototypes in Figma using components, variants, auto layout, and prototyping structures, including micro-interactions, transitions, and motion that strengthened the mobile experience.

Design System Evolution: Contributed to the evolution of a comprehensive component-based design system and design standards, ensuring experience consistency across iOS (HIG) and Android (Material Design).

Data-Informed Design: Supported design decisions with user research, behavioral data (Hotjar, Microsoft Clarity), and post-release performance analysis (CVR, task success rate).

Payment & Real-Time Experiences: Designed high-conversion payment and money management flows for a real-time, high-traffic financial product used across insurance payments and policy self-service.

Cross-Functional Collaboration: Worked closely with Product Managers, Engineers, QA, and Marketing, facilitating design workshops and strategy presentations to align stakeholders on product direction.

Design Critique & Mentorship: Actively participated in design critiques and idea sharing, mentored designers, and ran design reviews and QA, raising consistency and craft across the product.

AI-Assisted Workflow: Explored and integrated AI-assisted tools into research synthesis, ideation, and prototyping to increase design velocity and quality.

UI/UX Designer (B2B Enterprise Applications)

Texinsight, Istanbul, Turkey (Hybrid)

Apr 2022 – Aug 2023

User Research & Validation: Conducted usability testing and user interviews to identify friction points, translating insights into actionable design solutions and cutting iteration cycles 20%.

Complex Problem Solving: Translated complex B2B requirements into intuitive, data-heavy web and mobile applications, increasing task completion speed +25%.

Technical Alignment: Partnered with engineering to ensure feasibility and seamless implementation of high-fidelity prototypes.

Visual and UX Designer (Freelance)

Towercraft and T-HUB, Kocaeli, Turkey (Remote)

Sep 2021 – Apr 2025

Multi-Industry UX: Managed end-to-end UX and visual design for 30+ projects across diverse sectors, including loyalty platforms and digital service interfaces.

Brand and Business Alignment: Improved visual coherence 20% for global clients, aligning digital touchpoints with business goals and evolving customer expectations.

Product Designer (Packaging & Print)

Ceka Group, Istanbul, Turkey (On-Site)

Mar 2021 – Nov 2021

Physical Product & Packaging Design: Designed packaging, books, and brochures end-to-end, translating brand identity and business requirements into structural, print-ready product design solutions.

Production-Ready Design & Technical Handoff: Prepared final designs for print production (prepress), ensuring technical accuracy, material constraints, and print specifications were met before handoff to manufacturing.

Brand-Aligned Product Systems: Applied visual hierarchy and storytelling to build brand-consistent design systems across packaging and print collateral, balancing aesthetic, functional, and commercial requirements.

CREATIVE AND SIDE PROJECTS

Time Travel (End-to-End UX Case Study): Designed a mobile and web product from a UX challenge brief covering user research, persona and journey mapping, a minimal design system with design tokens and components, and high-fidelity, interactive prototypes; demonstrates independent, discovery-to-delivery product ownership.

Vita (Digital Health & Fitness App): End-to-end mobile product design case study covering research and competitive benchmarking, visual direction, a mobile design system, and high-fidelity prototypes (onboarding, mood picker, navigation); used AI-assisted research and design tools throughout the process.

Website (Portfolio): Designed and developed a personal portfolio in Framer showcasing end-to-end product design case studies, interactive prototypes, and design systems.

Sudoku (Side Project): Designed a light and dark mode mobile game UI with reusable components and interactive prototyping, showcasing component-based design and interaction depth.

EDUCATION

B.Sc. Industrial Product Design: Gazi University, Ankara, 2020

Associate Degree, Furniture and Decoration: Suleyman Demirel University, 2011

AWARDS AND RECOGNITION

Stevie Awards 2025: 2x Gold, 1x Silver, Best Use of Digital Channels

CX Awards Turkey 2025: Silver, Best Product and Service Development

Sardis Awards 2024: 3x Gold, 1x Silver, Excellence in Digital Financial Services

Hammers Awards 2024: 3x Industry Award, Digital Transformation Performance

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

Women in Tech: Inspiring Women Stories (Coderspace, Mar 2026)

Vodafone 1 Gun: Network Program (Vodafone, Mar 2026)

Scrum: The Basics (LinkedIn Learning, Dec 2024)

Agile Foundations (LinkedIn Learning, Dec 2024)

Product Design, Prototyping and Testing (edX, University of Maryland, Oct 2024)

Product Management Camp (Coderspace, Jan 2024)

User Experience for Web Design (LinkedIn Learning, Apr 2023)

UX Foundations: Interaction Design (LinkedIn Learning, Apr 2023)

UX, Junior UX Designer (Userspots, Apr 2023)

Enterprise Design Thinking Practitioner (IBM, Dec 2022)

ICMPD Enhancer: Entrepreneurship and Innovation Program, EU-Funded (ICMPD, Oct 2022)

Visual Elements of User Interface Design (CalArts, Jan 2022)

JR UX Designer (Userspots, Jan 2022)

UX Introduction Training (Gazi University, Mar 2021)

COMMUNITY AND MEMBERSHIPS

Member: ENTA, Turkish Industrial Designers Association (Active)

Fundraiser: UNICEF, Human Rights, 2010 to 2011
